“

Amazon Business not only had the lowest price of any individual supplier offer but could also get the bulk order to us much more quickly—and indeed the order of 5 million masks started to arrive in two weeks. This was a win not only to consolidate suppliers into our familiar procurement source, but was also by far the best price per unit and fastest delivery option available.

Logistics Ordering Unit Lead

With Amazon Business, we can focus on what the data means rather than on whether it is accurate. We used to review purchasing data every two or three months. Now we can look at it in real time, which makes us much more agile in our decision making.
